

# Take control of your health via your medical record.

**PatientSupportR** is a Brussels start-up in digital health dedicated to providing comprehensive support to patients and healthcare professionals. We ensure seamless access to medical records and continuity of care. Our flagship product, **Mova**, revolutionizes how patients manage and access their medical information through our interoperable connector.

## What is MOVA?

- Mova offers continuity of care for patients, at home or abroad. This by offering the MOVA technological framework, an interoperable connector empowering patients by giving them control over their medical records. It ensures that your health data is always accessible, secure, and up-to-date, no matter where you are, and available in various languages. Our vision is that medical data transparency, health literacy and patient engagement contributes to better outcomes for patients and society.

## Key Features of Mova connector:

### 1. Mova Consult

- **Understand Your Medical Records:** Mova translates medical terms into your preferred language, making it easier to understand your health information (health literacy).
- **Access Anytime, Anywhere:** Keep track of your medical records and share them with healthcare providers as needed to assure you get the right care at the right moment.

### 2. Mova Travel

- **Travel with Peace of Mind:** Carry your medical records with you in the language of your destination, ensuring you receive the care you need wherever you go.
- **Prepared for Any Situation:** Whether you are in perfect health or have chronic conditions, Mova ensures you are prepared for any medical emergencies during your travels.

### 3. Mova Relocate

- **Seamless Relocation:** Moving abroad or to a different region? Mova transfers your medical records to your new healthcare provider, ensuring continuity of care.
- **Efficient and Secure:** Your medical data is securely transferred and integrated into the new physician's patient software, reducing the risk of errors and saving time.

Are you ready to lead the way to empower patients via healthcare data?

## How to Get Started with Mova:

1. **Sign Up:** Visit [Mova](#) to create your account.
2. **Upload Your Records:** Import your medical records into the Mova platform.
3. **Access and Share:** Use Mova to access your records and share them with healthcare providers as needed.

## Continuity of care at home and abroad
